Trafalgar Park

iPad / iPhone guide: set up once at home, play outdoors with no screens and almost no data

https://tedisolebitsa-traffy.github.io/trafalgar-park/start.html

Your game is online (GitHub Pages, public repository). Open this address in Safari on each device.

1. Set up each device once (at home, on Wi-Fi)

1. Open **Safari** and go to the address above.
2. Wait until the page says **Ready for offline use** (about 4–6 MB is saved).
3. Tap **Share > Add to Home Screen > Add**.
4. Open the game from the new **Trafalgar Park** icon once, to check it works.
5. Do the same on the second device.

2. What the start page buttons do

The HOST	Has all the answers and the controls. This is the device you run the game from.
The SCREEN	Shows the game to everyone. It never receives an answer.
ONE phone only	Everything on one device. Good for Taboo and 30 Seconds.

3. Connecting two devices at the event

1. **Both devices:** Settings > Display & Brightness > **Auto-Lock > Never**, and turn the brightness up.
2. **Host device:** turn on **Personal Hotspot** (Settings > Personal Hotspot). **Screen device:** join that Wi-Fi.
3. **Host:** open the app > **The HOST** > **Connect a screen**. Allow the camera. A QR code appears.
4. **Screen:** open the app > **The SCREEN** and scan that QR code. It then shows a reply code.
5. **Host:** tap **Step 2 Scan the screen's reply** and scan it. You will see **Connected**.
6. Tap once on the screen device so it is allowed to play sound.

The two devices talk directly to each other over the hotspot, so this uses no mobile data. Bluetooth is not possible from a web page on iPhone/iPad. If the camera will not scan, use **Copy code** and paste it into the other device (for example through a message).
If the link drops, tap **Reconnect to host** on the screen device and repeat steps 3–5.

4. Running the game (host device)

Host tab (bottom left)	Setup, controls and the answers.
Screen tab (bottom right)	A live copy of what the audience sees.
Mode	After "Let's play": **Normal** (single games) or **Team Tournament** (2 teams of 4, Quick = 4 matches or Big = 16).
Correct / Skip / Incorrect	Big buttons on both devices; use either. Keys C, S, X, N and Space work with a keyboard.
Connect a screen	Top of the host device. Use it any time to (re)connect.

Gear button	Sound on/off, adapt to screen, hide display buttons, fullscreen, shortcuts.

5. The games

30 Seconds	Two teams, 5 words per card, 30 s timer.
Taboo	4-team tournament, Normal or Hard.
Taboo Knockout	Type any number of names. Random teams of 2; each team owns a box; the winner takes the loser's box; re-shuffle until one team owns them all.
Imposter	3–8 players. Roles are shown only on the host device.
Picture Game	Emoji, Flags, Maths, Bible Books, Cartoons and your own pictures.
Bottle Blind	Show order, hide it, place bottles, Check, swap, repeat.
Higher or Lower	Two-player 60 s duel.
Finish the Proverb	Easy (default) or All; includes Bible verses. Incorrect shows the answer.
Speed Maths	Tallies and Roman numerals, 60 s each, streak bonus.
Number Hunt	Find 1–16 in order; Spin the Wheel decides who starts.

6. Good to know

- **Test everything at home first** with the two devices, on the hotspot.
- **Updates:** open the app once with internet and it refreshes its saved copy automatically.
- **Public site:** anyone with the link can read the answers, so share the link only with your helpers.
- Full instructions are also in the project README ("Playing outdoors on phones").
